

# Viz Libero Free

## LAPTOP REQUIREMENTS

### System Prerequisites

- An NVIDIA Graphics card is required on your laptop to run Viz Libero Free. Recommended models below.
- Viz Libero Free is only supported on Windows 10/x64 (LTSC 1809) or Windows 11 operating systems. A US/English version of Windows is expected. Other languages may cause issues.
- A valid Viz Libero Free license is required to run Viz Libero Free on a laptop computer.

### Minimum Recommended Components

Processor	Intel i7(2.2GHz)
Memory	16GB DDR3,1600MHz
Display Resolution	15" Full-HD (1920 x 1080) or better
Graphics Card	4GB GPU minimum (only works for 720p projects), 8GB GPU recommended. Below is a list of the minimum recommended models from each generation: GTX 1050, P2000, T2000, Quadro RTX 3000
Hard Disk	256GB or more(SSD recommended)

### NOTE:

- You might be able to run Viz Libero Free on your laptop with less powerful components than listed above, but you risk lower performance or inability to run the program. 8GPU is required to support AI Cutouts (remove the background from objects so they can be moved around.)
- This document does not guarantee that Viz Libero Free will work on a specific laptop or component listed above as the requirements regarding hardware cannot be tested for all brands and setups.
- It is recommended to open all projects in 720p format in the settings to prevent performance issues.
